Datasheet

ATRIUM KRYPTO / ACPR - Car Plate Recognition

Product description

CDVI enabled 2 licence modules to work in conjunction with the ATRIUM access control system: AVISION & ACPR.

ACPR: Used with any smart numberplate recognition camera with Wiegand ouput, numberplates are scanned and checked in the ATRIUM database to allow card-free access through a car gate.

Product specifications

Integration: CDVI ATRIUM
Connection: 1 licence card, modules
Compatibility: Wiegand 26-bit (SCHA1) output cameras
Type: Numberplate recognition camera

Key features

- ATRIUM KRYPTO integration modules

- 1 licence card per site

- Compatible with 26-bit Wiegand output cameras

- Manage vehicle entry and exit on user profiles

1. Activate the video licence by presenting the licence card in front of your reader.

2. Download the software on your computer.

ATRIUM KRYPTO / AVISION - CCTV Video Integration

Product description

CDVI enabled 2 licence modules to work in conjunction with the ATRIUM access control system: AVISION & ACPR.

AVISION: Integratable CCTV module for ONVIF, HIKVision and Dahua cameras. ATRIUM can show up to 4 channels, allowing full visibility and security over the site by verifying who triggered door events.

Product specifications

Integration: CDVI ATRIUM
Connection: 1 licence card, modules
Compatibility: HIKVision, Dahua, NVR systems, ONVIF protocol
Selectable access events:
door opened, door forced, access granted, access denied

Key features

- ATRIUM KRYPTO integration modules

- 1 licence card per site

- Compatible with ONVIF, HIKVision, Dahua, NVR

- 3 operation modes:
    - Live video streaming,
    - Delayed viewing of events,
    - Video pop-up triggered by access events

① Activate the video licence by presenting the licence card in front of your reader.

② Download the software on your computer.
Link: https://tdrv.eu/k1syGj

③ Install and set-up the software.
